

## WHY CHOOSE GAME READY?

Clinically proven to help you enhance recovery and reach key physical therapy milestones faster – outperforming conventional RICE (Rest–Ice–Compression–Elevation) applications.

Clinically proven to reduce pain and swelling while decreasing the use and/or enabling an earlier discontinuation of narcotic medications that may have undesirable side effects.

Injury and post-op treatment system of choice for thousands of elite athletes, pro sports teams, orthopedic specialists, and physical therapists around the world.

In ongoing surveys, over 96% of patients report that Game Ready provided a better post-op recovery experience than a previous surgery using a different cold therapy.\*

GAME READY®

CRYO/CUFF™

GEL PACK

Game Ready with active compression delivers cold therapy that works faster, penetrates deeper, and lasts longer than typical applications.

GAME  READY®

# HEAL FASTER RECOVER BETTER

GAME  READY®

THE NEW STANDARD OF CARE  
IN INJURY & POST-OP RECOVERY

“THE COOLING AND COMPRESSION EFFECT WAS THE ONLY THING THAT QUIETED MY ANKLE DOWN ENOUGH THAT I COULD ACTUALLY GET TO SLEEP.”

Deborah Larson  
Patient

“I PRESCRIBE GAME READY BECAUSE IT PROVIDES A SIGNIFICANT DECREASE IN THE NEED FOR PAIN MEDICATION AND AT LEAST A 20% FASTER RECOVERY.”

Peter Millett, MD, MSc  
The Steadman Clinic

## REDUCE PAIN AND SWELLING, CUT NARCOTIC MEDICATIONS, ACCELERATE RECOVERY

If you've suffered a musculoskeletal injury or had an orthopedic surgery, you want to get back to the activities you love as quickly as possible. Game Ready® goes beyond treating symptoms, helping your body to heal faster and recover better.

### LEADING-EDGE TECHNOLOGY RECOMMENDED BY PROFESSIONALS

The Game Ready System is comprised of an advanced control unit and a range of ergonomic wraps. Using revolutionary ACCEL® Technology (Active Compression and Cold Exchange Loop), the proven system integrates pneumatic compression and adjustable cold therapies to safely reduce swelling and pain, decrease the need for narcotic medications, and naturally accelerate recovery.

## COMPRESSION AND COLD WORKING TOGETHER LIKE NEVER BEFORE

- The convenient and portable Game Ready System features intuitive controls, automated settings, easy-to-apply wraps, online how-to tools, and friendly customer support to assure quick, no-hassle setup and operation.
- Active pneumatic compression mimics natural muscle contractions, helping your body pump away swelling (edema) while stimulating the flow of oxygenated blood to your injury.
- Adjustable cold therapy actively removes heat and cools the injury or surgery site to reduce swelling, muscle spasms, and pain in a non-narcotic application.
- Air pressure conforms the circumferential wrap to your body for better surface contact, enhancing the effects of deep-penetrating cold therapy.

Faster, deeper, longer-lasting intramuscular cooling slows cellular metabolism, helping your body to minimize tissue damage after an injury – and less damage means faster recovery.

GAME  READY®

### ANATOMICALLY ENGINEERED WRAPS PROVIDE BETTER COVERAGE, FIT AND RESULTS

The Game Ready System's patented dual-action ATX® (Active Temperature Exchange) wraps are designed to optimize therapeutic cold and compression treatment of all major body parts. The wraps provide circumferential coverage and better surface contact for improved performance – and because they fit better, they're more comfortable too.
